

# FYP.pk

As we know in an entire calendar year, almost 10,000 above projects are presented and then discarded in Pakistan. There is no one to invest in these projects or to buy these projects.

But, what if we give these talented students a platform to sell their projects or present them to the World or to investors? No matter which field they are from, they can create an account and upload their projects on our website.

Students will have the opportunity to gain investment to promote their idea. Their idea will not be thrown in the trash. Moreover, there is a possibility that their project will be bought by another student for his final year project.

Now, What's in it for us?

Firstly, we'll have to make our website free of cost for everyone to gain traffic. And then, when we get enough traffic, we'll make it paid. Whenever a user uploads a project, he'll have to pay a decided amount. Or, we could cut the decided amount whenever a project gets sold. Moreover, we can earn from advertisements too.
